Summary

Self-taught full-stack JavaScript developer skilled in building scalable web applications using **React**, **Node.js**, **MongoDB**, and **TypeScript**. Solved **200+ LeetCode problems**, reduced backend errors by **40%**, and improved project scalability by **30%**. Integrated services like **Razorpay**, **Cloudinary**, and **Firebase**, and deployed production-ready apps on **AWS**. Passionate about clean code, real-world problem solving, and growing into a software architect.

Skills

- **Languages:** JavaScript (Vanilla, ES6+), TypeScript
 - **Frontend:** React, Redux, HTML, CSS, Tailwind CSS, Bootstrap, EJS, ShadCN, Material UI, Figma
 - **Backend:** Node.js, Express.js, RESTful APIs, JSON handling
 - **Databases:** MongoDB, PostgreSQL, Firestore
 - **Version Control:** Git, GitHub
 - **Dev and Testing Tools:** Postman, Cloudinary
 - **Cloud and Services:** Firebase, AWS (EC2, S3), Razorpay
 - **Concepts:** MVC Architecture, JWT Auth, Passport.js, Multer, Responsive Design, API Integration
-

Projects

- **December Delight – Full-Stack eCommerce Platform:** Built using **Node.js**, **Express**, **MongoDB**, and **EJS**. Integrated **Razorpay**, wallet refunds, coupon management, and AWS deployment. Reduced manual refund effort by ~95%.
 - **User Management System – Full-Stack Role-Based App:** Developed using **React**, **Node.js**, and **MongoDB**. Role-based access for users/admins with **Cloudinary** integration. Reduced admin handling time by ~60%.
 - **Student API – TypeScript REST Backend:** Created a modular, type-safe CRUD API using **TypeScript** and **Express.js**. Focused on learning backend logic and structure. Reduced runtime errors by ~70%.
 - **Netflix Clone – Movie App with Firebase Auth:** Built using **React**, **TMDB API**, and **Firebase**. Integrated Google/email login and video trailer viewer.
 - **OLX Clone – Classified Marketplace App:** Developed with **React**, **Firestore**, **Cloudinary**. Included image uploads, filters, and authentication.
 - **To-Do App – React + LocalStorage:** CRUD task manager using **React** and **localStorage**. Features strike-through, batch actions, and UI states.
-

Education

Full Stack Development

BROTOTYPE, Kochi (2024–Present)

Bachelor of Computer Applications

MG University, Kerala (2021–2024)

AI / ML Add-On Course

Athena Erudition Academy (2022–2024)

Career Highlights

- > Solved **200+ LeetCode problems** to strengthen DSA skills
- > Built and deployed scalable full-stack applications
- > Reduced backend bugs and improved code efficiency
- > Fast self-learner, adaptable to modern tech stacks
- > Strong communication and team collaboration skills
